RCTC Challenges World Logistics Center Environmental Approval

The Riverside County Transportation Commission (RCTC) has voted 20-1 to authorize the filing of a lawsuit challenging the City of Moreno Valley's approval of an Environmental Impact Report (EIR) for the World Logistic Center project.

RCTC's challenge to the environmental document is related to the EIR's analysis of regional transportation impacts and the lack of mitigation to address the impacts.

The lawsuit will be filed by Friday, September 18.
